

MANUAL TOOL CHANGE LARGE INDUSTRIAL ROBOTS

大機械手臂手動工具快換器

PRODUCT FEATURES AND SPECIFICATIONS

- **Fast and accurate movement** 鎖住解開有快又準
Re-deploys in seconds
- **Accurate** 超精準定位, 誤差0.05mm
Re-positioning with the range of five hundredth of a millimeter.
- **Easy to use** 容易使用
Quick release with accurate locking system.
- **Custom Base** 可以客製
On request, Smartshift-robotics Custom manufacture bases to fit your Robot or Cobot type. Smartshift Base connects to all Robots, Industrial and Collaborative.
- **Handling payload** 500 kg 負載能力
- **Weight:** Small: Medium: Large:

Manual Tool Change Large Industrial Robot

The Smartshift Robotics Manual Tool Change system for Large Industrial Robots efficiently supports the change in tool replacement when larger Robots are to change from one task to another, replace older tools or are in needs of EOAT Maintenance.

In stead of bolting and un bolting the EOAT, the Smartshift system acts as a safety also due to the swift and easy handling and maneuvering while releasing and attaching your needed robot equipment.

換工具免把螺絲！用 SMARTSHIFT 快換器搞定
The same system is used as Base system for smaller robots and with its 3 different sizes as standard, but also the option to use adapters or have retro fitted bolt patterns, the Smartshift manual Tool Change systems is a preferred option for Robot cells in the higher payload range. 可以客製接頭. 負載能力到 500 kg
